Motivated Junior Web Developer with experience in full-stack development and DevOps practices. Possess strong problem-solving skills and a commitment to continuous learning. Seeking opportunities to apply my skills in a collaborative environment.

Education

2021-2024: B.Sc. in Computer Science, Ono Academic College, GPA: 85

Sample Projects

Notes App [repo] I developed a cross-platform mobile note-taking application using **Flutter**. The app features user authentication with **Firebase Auth** for secure registration and login. It integrates **Firebase Firestore** for real-time data synchronization, allowing users to create, share, and sync notes across multiple devices.
The app delivers a responsive and intuitive user experience on both iOS and Android platforms.

Charity CRM System [repo] Developed a full-stack Charity CRM using the MERN stack (**MongoDB, Express, React, Node.js**) for efficient donation and donor management. **MongoDB** handled data storage, with **Mongoose** facilitating real-time updates. Integrated **JWT-based authentication** and role-based authorization for secure access. Designed a responsive **React** frontend with **Bootstrap**, and deployed on **AWS EC2** with **Docker**, utilizing **NGINX** for load balancing.
